

CLAIMS

1. A fumarate derivative having at least one group represented by formula (1) as the terminal groups and having two or more groups represented by formula (2) as
 5 a repeating unit:

Formula (1)

Formula (2)

- 10 (wherein in formula (1), each R^1 independently represents formula (3) or (4), and in formula (1) or (2), X^1 and X^2 each independently represents an organic residue derived from a polyhydric alcohol having from 2 to 6 hydroxyl groups and 2 to 30 carbon atoms, provided
 15 that X^1 and X^2 may be ester-bonded to have a branched structure having a group represented by formula (1) as the terminal groups and having a group represented by formula (2) as a repeating unit);

Formula (3)

20

10061030-62288002

(wherein R² and R³ each independently represents hydrogen atom or an alkyl group having from 1 to 5 carbon atoms);

Formula (4)

(wherein R⁴ represents hydrogen atom or an alkyl group having from 1 to 11 carbon atoms).

2. A fumarate derivative having at least one group
 10 represented by formula (1) as the terminal groups and having two or more groups represented by formula (2) and/or formula (5) as a repeating unit:

Formula (1)

- 15 Formula (2)

Formula (5)

- (wherein in formula (1), each R¹ independently represents formula (3) or (4), and in formulae (1), (2) and (5), X¹, X² and X³ each independently represents an organic residue derived from a polyhydric alcohol having from 2 to 6 hydroxyl groups and having from 2 to

10068828800T 03-1902

30 carbon atoms, provided that X¹, X² and X³ may be ester-bonded and/or ether-bonded to have a branched structure having a group represented by formula (1) as the terminal groups and having a group represented by

5 formula (2) and/or formula (5) as a repeating unit);

Formula (3)

(wherein R² and R³ each independently represents hydrogen atom or an alkyl group having from 1 to 5
10 carbon atoms);

Formula (4)

(wherein R⁴ represents hydrogen atom or an alkyl group having from 1 to 11 carbon atoms).

15

3. The fumarate derivative as claimed in claim 1 or 2, wherein the number of repetitions of the repeating unit represented by formula (2) is any one in the range from 2 to 10.

20

4. The fumarate derivative as claimed in claim 2 or 3, wherein the number of repetitions of the repeating unit represented by formula (5) is any one in the range from 2 to 5.

206TE00 6228800T

5. The fumarate derivative as claimed in any one of claims 1 to 4, wherein 80% or more of R¹ in formula (1) is formula (4).

5

6. The fumarate derivative as claimed in any one of claims 1 to 5, wherein R⁴ in formula (4) is any one selected from the group consisting of hydrogen atom, a methyl group, an ethyl group, an n-propyl group and an 10 isopropyl group.

7. The fumarate derivative as claimed in any one of claims 1 to 6, wherein X¹, X² and X³ in formulae (1), (2) and (5) each independently is an organic residue 15 derived from at least one alcohol selected from the group consisting of an alkylene diol, an alicyclic diol and an aromatic diol.

8. The fumarate derivative as claimed in any one of 20 claims 1 to 7, wherein the organic residue as claimed in claim 7 is represented by formula (6).

Formula (6)

10068229.021902

(wherein R⁵ and R⁶ each independently represents hydrogen atom or formula(7));

Formula (7)

5 (wherein R⁷ represents hydrogen atom or an alkyl group having from 1 to 3 carbon atoms).

9. The fumarate derivative as claimed in any one of claims 1 to 8, wherein at least one terminal group is a 10 group represented by formula (8):

Formula (8)

10. The fumarate derivative, which is represented by 15 formula (9):

Formula (9)

(wherein each X⁴, which is present in the number of d in formula (9), independently represents an alkylene 20 group or a cycloalkylene group having from 5 to 12 carbon atoms, d represents an integer of 1 to 5, and R²

10088229.031902

and R³ each independently represents hydrogen atom or an alkyl group having from 1 to 5 carbon atoms).

11. The fumarate derivative as claimed in claim 10,
5 wherein X⁴ in formula (9) is an alkylene group
represented in formula (6).

Formula (6)

(wherein R⁵ and R⁶ each independently represents
10 hydrogen atom or formula(7));

Formula (7)

(wherein R⁷ represents hydrogen atom or an alkyl
group having from 1 to 3 carbon atoms).

- 15
12. The fumarate derivative as claimed in any one of
claims 1 to 9, wherein at least one terminal group is a
hydroxyl group.

- 20 13. The fumarate derivative, which is represented by
formula (10):

Formula (10)

1006100 · 6228800T

(wherein Z represents an organic residue derived from a tri-, tetra-, penta- or hexa-hydric alcohol, R¹ independently represents formula (3) or formula (4), 5 each X⁵, which is present in the number of a in formula (10), independently represents an alkylene group or a cycloalkylene group having from 5 to 12 carbon atoms, a represents an integer of 1 to 5, b represents an integer of 1 to 6, c represents an integer of 0 to 5, 10 and b+c is from 3 to 6);

Formula (3)

(wherein R² and R³ each independently represents hydrogen atom or an alkyl group having from 1 to 5 15 carbon atoms);

Formula (4)

(wherein R⁴ represents hydrogen atom or an alkyl group having from 1 to 11 carbon atoms).

14. The fumarate derivative as claimed in claim 13, wherein X⁵ in formula (10) is an alkylene group represented in formula (6).

Formula (6)

5

(wherein R⁵ and R⁶ each independently represents hydrogen atom or formula(7));

Formula (7)

10 (wherein R⁷ represents hydrogen atom or an alkyl group having from 1 to 3 carbon atoms).

15. The fumarate derivative, which is represented by formula (11):

15 Formula (11)

(wherein, R¹ independently represents formula (3) or formula (4), and l and m each independently represents an integer of 1 to 5);

20 Formula (3)

(wherein R^2 and R^3 each independently represents hydrogen atom or an alkyl group having from 1 to 5 carbon atoms);

5 Formula (4)

(wherein R^4 represents hydrogen atom or an alkyl group having from 1 to 11 carbon atoms).

(wherein R^5 and R^6 each independently represents

10 hydrogen atom or formula(7));

Formula (7)

(wherein R^7 represents hydrogen atom or an alkyl group having from 1 to 3 carbon atoms).

15

16. A method for producing a fumarate derivative as claimed in any one of claims 1 to 9 and claim 12, comprising reacting a fumarate derivative having at least one formula (8) in the terminal groups and having

20 two or more groups represented by formula (2) as a repeating unit with a polyhydric alcohol having from 2 to 6 hydroxyl groups and having from 2 to 30 carbon atoms in the presence of a catalyst.

1006100-6222880002

17. A method for producing a fumarate derivative as
claimed in claim 13 or 14, comprising reacting a
fumarate derivative having at least one group
5 represented by formula (8) in the terminal groups with
a polyhydric alcohol having from 2 to 6 hydroxyl groups
and having from 2 to 30 carbon atoms in the presence of
a catalyst.
- 10 18. A method for producing a fumarate derivative as
claimed in any one of claims 1 to 9 and claim 12,
comprising reacting a fumarate derivative having at
least one group represented by formula (8) in the
terminal groups and having two or more groups
15 represented by formula (2) as a repeating unit with a
polyhydric alcohol having from 2 to 6 hydroxyl groups
and having from 2 to 30 carbon atoms in the presence of
a condensing agent and a base.
- 20 19. A method for producing a fumarate derivative as
claimed in claim 13 or 14, comprising reacting a
fumarate derivative having at least one group
represented by formula (8) in the terminal groups with
a polyhydric alcohol having from 2 to 6 hydroxyl groups

10088229.031902

and having from 2 to 30 carbon atoms in the presence of a condensing agent and a base.

20. A method for producing a fumarate derivative as
5 claimed in claims 18 and 19, wherein the condensing
agent is sulfonyl chloride.

21. The method for producing a fumarate derivative as
claimed in any one of claims 16 to 20, wherein the
10 polyhydric alcohol having from 2 to 6 hydroxyl groups
and having from 2 to 30 carbon atoms is at least one
selected from the group consisting of
trimethylolpropane, trimethylethane, pentaerythritol,
ditrimethylolpropane, dipentaerythritol and adducts
15 thereof with an ethylene oxide or a propylene oxide.

22. A method for producing a fumarate derivative
having formula (4) in the terminal groups, comprising
isomerizing terminal groups of a fumarate derivative
20 having formula (3) as the terminal groups in the
presence of a catalyst to convert said terminal groups
into formula (4).

23. The method for producing a fumarate derivative
25 having formula (4) in the terminal groups as claimed in

10088220-031902

claim 22, wherein the fumarate derivative having formula (3) as the terminal groups is the fumarate derivative described in any one of claims 1 to 15.

5 24. The method for producing a fumarate derivative having formula (4) in the terminal groups as claimed in claim 22 or 23, wherein 80% or more of the fumarate derivative having formula (3) as the terminal groups is converted into formula (4) by the isomerization
10 reaction.

25. The method for producing a fumarate derivative having formula (4) in the terminal groups as claimed in claim 22 or 23, wherein the catalyst used for the
15 isomerization reaction is a catalyst containing at least one of palladium, rhodium and ruthenium.

26. A polymerizable composition comprising the fumarate derivative as claimed in any one of claims 1
20 to 15.

27. The polymerizable composition as claimed in claim 26, which comprises:

25 from 1 to 99% by mass of the fumarate derivative described in any one of claims 1 to 15, and

10088229.031902

100

from 1 to 99% by mass of at least one compound selected from the group consisting of an unsaturated polyester, an oligomer having (meth)acrylate group and a radical polymerizable monomer.

5

28. A polymerizable composition comprising:

100 parts by mass of the polymerizable composition described in claim 26 or 27, and

from 0.01 to 15 parts by mass of a radical 10 polymerization initiator.

29. A cured product obtained by curing the polymerizable composition as claimed in any one of claims 26 to 28.

15

30. The fumarate derivative, which is represented by formula (25):

Formula (25)

20

(wherein, R^1 independently represents formula (3) or formula (4), and p represents an integer of 1 to 9);

Formula (3)

10088229-031902

(wherein R^2 and R^3 each independently represents hydrogen atom or an alkyl group having from 1 to 5 carbon atoms);

5 Formula (4)

(wherein R^4 represents hydrogen atom or an alkyl group having from 1 to 11 carbon atoms).

0088226-031602
